

RECYCLING AS EASY AS 1-2-3

# Announcing a new way to recycle!

Your household will soon receive a new recycling cart! These easy-to-roll carts will replace your current three-bin system. To take our recycling program to the next level, Waste Connections, Clark County and several local cities are switching to rollcarts.

The new cart makes it easier to recycle. You can mix more material into one large-capacity cart, and it's easy to roll to the curb.

## WHEN DO WE START?

A new cart will be delivered to your house in the next few weeks.

An information packet will be left with your cart, which will include easy-to-follow recycling instructions. If you have questions, please call Waste Connections at **360-892-5370** or visit **[www.wcnorthwest.com](http://www.wcnorthwest.com)** for more information.

# Life's about to get a little easier.

Introducing a new cart that will help make recycling as easy as

**1-2-3!**

**2**

**3**

# Recycle more.

# More easily.

## WHY THE BIG CHANGE?

Although we're doing a great job recycling in Southwest Washington, we're also generating more waste. To take our recycling program to the next level, Clark County and several local cities are switching to larger, more efficient roll carts.

The new cart makes it easier to recycle! You can fit more material into one large-capacity cart – you can now recycle plastic tubs, buckets and nursery pots curbside – and it's easy to roll to the curb for pickup.

## MORE CAPACITY

A large cart requires fewer trips to the curb.

**You only need to set the cart out when it is full!**

## CLEANER NEIGHBORHOODS

Cart lids keep materials dry and contained so they don't blow around the neighborhood!

## SAFER

Recycling trucks grab and tip the carts. Less heavy lifting for your recycling driver.

## EASY TO MOVE

Wheels and a handle make the cart easier to move to the curb.

## LESS SORTING

Most of your recyclables will go in just one cart.

### METAL

### PAPER & CARDBOARD

### PLASTIC BOTTLES & TUBS

## WHAT WE CAN'T RECYCLE AT THE CURB

The items listed below should not be placed in your recycling cart or bin.

- Styrofoam™ and other block foam (Watch for special collection events)
- Plastic bags (Look for a collection bin at your grocer)
- Napkins and paper towels
- Wax, plastic, or foil-coated paper such as frozen food boxes
- Paper cups or plates
- Food-soiled paper

## Follow these three easy steps to recycle more!

- 1** Most of your recyclables will go into just one big cart.

- 2** Then place glass in your bin to the side of the cart...

- 3** ...and motor oil or anti-freeze in a clear jug next to the bin. Batteries go in a clear plastic bag on top of the cart. And you're done!
